II.2.4) Description of the procurement

In June 2008, the Electronic Prescribing and Eligibility System (EPES) went live. The objective of the project was to capture prescription information from Community Pharmacies into a central EPES Database. This system was introduced to speed up pharmacy re-payments, allow for closer scrutiny of the prescribing and dispensing process, and reduce lost income through patients falsely claiming to be in receipt of a qualifying Social Security benefit.

Failure to provision the extended support places BSO at serious risk of an application failure from which we would be unable to recover from. Contractor payments of approximately £576m per annum would be defaulted on and there would also be a risk of fraud as it would be impossible to process prescriptions and estimate payments manually.

Considerable reputational damage to BSO and the wider DoH would be incurred with also a risk of legal action from contractors who have not had payments made to them.

DXC are the incumbent contractors and own the Intellectual Property Rights on the software.
