Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Inventory Management System

II.1.2) Main CPV code

- 48430000 - Inventory management software package

II.1.3) Type of contract

Supplies

II.1.4) Short description

The Inventory management system project is to implement an IM system to manage medical and surgical products to improve patient care, quality, efficiency, cost effectiveness and reduce overall financial and safety risk.

For UCLH it will need to integrate with the Trust's ordering and NHS Supply Chain systems as well as with finance (Oracle Fusion), EHRS (Electronic Health Records System) (EPIC is the system name) and product catalogues to provide visibility and efficient management of stock (further considerations around EHRS (EPIC)).

An IM System tracks products through the entire supply chain or in an area of the business it operates in, it enables barcoding, reporting, forecasting, alerts, accounting, automated ordering, tracking and multiple location management.

It enables an organisation such as UCLH to oversee the constant flow of goods into the Trust and as they are consumed.

We would like to engage with the market to ensure all due diligence is undertaken and we understand the capabilities of the market and the systems available and future innovations have been considered, before we start the procurement process.

II.1.5) Estimated total value

Value excluding VAT: £500,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKI - London

Main site or place of performance

University College Hospitals London

II.2.4) Description of the procurement

Restricted competitive dialogue

II.3) Estimated date of publication of contract notice

30 November 2023

Section IV. Procedure

IV.1) Description
