Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Supply of New Sterile Connection Devices

Reference number

C220866

II.1.2) Main CPV code

- 33100000 - Medical equipments

II.1.3) Type of contract

Supplies

II.1.4) Short description

Supply of Sterile Connection Devices, Consumables, Repair and Maintenance

II.1.5) Estimated total value

Value excluding VAT: £1,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.2) Additional CPV code(s)

- 50400000 - Repair and maintenance services of medical and precision equipment
- 33100000 - Medical equipments

II.2.3) Place of performance

NUTS codes

- UK - United Kingdom

Main site or place of performance

NHS Blood and Transplant
500 North Bristol Park
Bristol
BS34 7QH

II.2.4) Description of the procurement

NHS Blood and Transplant (NHSBT) is a special health authority providing a blood and transplantation service to the NHS, looking after blood donation services in England and transplant services across the UK. This includes managing the donation, storage and transplantation of blood and blood components, organs, tissues, bone marrow and stem cells, and researching new treatments and processes.

As an essential part of the NHS we take pride in playing our part to make the most of absolutely every donation – from blood and organs to tissues and stem cells. With the support of our amazing donors, we give a lifeline to thousands of people every year. But there is always more to do, which is why we continually strive to improve the safety, availability, quality and efficiency of our services.

SCDs are essential for NHSBT to produce a wide range of blood components. They are used to connect ancillary packs to primary components to allow the manufacture of secondary components (washed red cells or platelets), in the production of pooled components (platelets, granulocytes and cryoprecipitate) and to manufacture neonatal split components (red cells, plasma and platelets). SCD's are also used during bacterial screening and in areas outside of blood supply such as Tissue Services, Cellular and Molecular Therapy (CMT).

SCDs are essential for NHSBT to produce a wide range of blood components. They are used to connect ancillary packs to primary components to allow the manufacture of secondary components (washed red cells or platelets), in the production of pooled components (platelets, granulocytes and cryoprecipitate) and to manufacture neonatal split components (red cells, plasma and platelets). SCD's are also used during bacterial screening and in areas outside of blood supply such as Tissue Services, Cellular and Molecular Therapy (CMT).
