## Section II: Object

### II.1) Scope of the procurement

#### II.1.1) Title

The UK Urban NO<sub>2</sub> Network (UUNN) 2024

Reference number

C26270

#### II.1.2) Main CPV code

- 90731100 - Air quality management

#### II.1.3) Type of contract

Services

#### II.1.4) Short description

The UUNN was first established in January 2020 and has expanded since to respond to evidence needs and is currently operating at ~299 sites.

The primary aim of the UUNN is the provision of additional NO<sub>2</sub> monitoring data for inclusion within the national UK compliance assessment. Previously the national assessment of NO<sub>2</sub> has comprised of a UK-wide automatic monitoring network; the Automatic Urban and Rural Network (AURN), and national scale modelling; the Pollution Climate Mapping (PCM) model.

UUNN monitors were sited specifically to target areas where modelling had indicated an exceedance of the annual mean NO<sub>2</sub> limit value, and where concentrations predicted by the PCM model and by local modelling completed by a relevant local authority were not in good agreement.

The two requirements to identify specific road links for UUNN measurements within these areas were originally as follows:

? Where the PCM model and/or modelling completed by a relevant local authority had predicted an exceedance of the NO<sub>2</sub> annual
