Regional or local authority

I.5) Main activity

General public services

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Treatment of Green Garden Waste

Reference number

DN702230

II.1.2) Main CPV code

- 90510000 - Refuse disposal and treatment

II.1.3) Type of contract

Services

II.1.4) Short description

The Council wishes to secure appropriate facilities for the treatment / processing of 'green' waste. This waste stream does not include food waste, cardboard or street sweepings.

"Treatment" shall mean the controlled biological decomposition and stabilisation of organic substrates under conditions that are predominantly aerobic, and that allow the development of thermophilic temperatures as a result of biologically produced heat. The process results in a final Composted Product that has been sanitised and stabilised, is high in humic substances and can be used as a soil improver, as an ingredient in growing media, or blended to produce a top soil that will meet British Standard BS 3882,

This material will have been collected separately by the Council or its' agents at the household waste recycling centres, via fortnightly household garden waste bin collections and other adhoc means (eg Christmas tree recycling collections). The Council requires a process that achieves compliance with National Indicator 192 (ie not 'shred and spread').

II.1.5) Estimated total value

Value excluding VAT: £1,000,000

II.1.6) Information about lots

This contract is divided into lots: No

II.2) Description

II.2.3) Place of performance

NUTS codes

- UKD41 - Blackburn with Darwen

II.2.4) Description of the procurement

The Council wishes to secure appropriate facilities for the treatment / processing of 'green' waste. This waste stream does not include food waste, cardboard or street sweepings.

"Treatment" shall mean the controlled biological decomposition and stabilisation of organic substrates under conditions that are predominantly aerobic, and that allow the development of thermophilic temperatures as a result of biologically produced heat. The process results in a final Composted Product that has been sanitised and stabilised, is high in humic substances and can be used as a soil improver, as an ingredient in growing media, or blended to produce a top soil that will meet British Standard BS 3882,

This material will have been collected separately by the Council or its' agents at the household waste recycling centres, via fortnightly household garden waste bin collections and other adhoc means (eg Christmas tree recycling collections).
