Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated without a prior call for competition

- Additional deliveries by the original supplier

Explanation:

Additional deliveries by the original supplier are for partial replacement goods or installations (or an extension of existing supplies or installations) where a change of supplier leading to goods having different technical characteristics would result in incompatibility or disproportionate technical difficulties.

- Continuation of Existing Systems: Nedap Access Control Hardware and software supplied by Trinity are already integral components of our facility's security infrastructure at Culham, Rotherham, and West Burton sites.
- Avoiding Incompatibility: Introducing hardware from a different supplier could lead to incompatibility issues with our existing systems, resulting in unreliable access control and significant security risks.
- Seamless Integration: Products are designed to integrate seamlessly with our current access control and fire systems.
- On-Site Knowledge: Trinity has an in-depth understanding of our site's specific needs, system configurations, and security protocols.
- Efficient Implementation: Their familiarity allows for quicker installation and troubleshooting, minimizing downtime and ensuring consistent security operations.
- Maintenance Continuity: As our current maintenance provider, Trinity ensures that all systems function cohesively. Introducing another supplier could disrupt this continuity.
