- 44211000 - Prefabricated buildings

#### **II.2.3) Place of performance**

NUTS codes

- UKM - Scotland

Main site or place of performance

Scotland

#### **II.2.4) Description of the procurement**

Framework Agreement for the supply of modular water sampling kiosks.

The kiosks shall be assembled in a 'factory' environment producing tested and fully functional units of a standardised and repeatable design for delivery to site ready for off-loading to a pre-prepared foundation slab or final installation area.

The Scottish Water area covers all mainland and islands of Scotland including urban and rural locations. Scottish Water retains the right to ensure complete geographical coverage from the framework.

Water sampling kiosks are used to monitor the water quality produced at Scottish Water sites and within its networks. It is important that sampling kiosks are of sufficient quality to provide accurate samples for analysis and meet regulatory compliance requirements. A standard product range (a complete design with full support documentation) will be used to ensure efficient delivery of quality compliant standardised kiosks that provide a safe and effective working environment for samplers across the Scottish Water estate.

#### **II.2.5) Award criteria**

Quality criterion - Name: Technical Capability and Service Delivery / Weighting: 30

Quality criterion - Name: Value Delivery / Weighting: 10

Price - Weighting: 60

#### **II.2.11) Information about options**

Options: Yes

Description of options

The Buyer reserves the right to purchase additional ancillary goods and services.
