#### **II.1.3) Type of contract**

Supplies

#### **II.1.4) Short description**

The Council is seeking an asset management database system capable of supporting the fullest functionality across a wide range of asset management activities. It needs to be capable of being implemented in an incremental, modular way to reflect the Council's priorities. The system is expected to hold a full record of the Council's ownership including leased-in assets and be used for the management of the Council's operational and commercial property portfolio. The Council's aim is for an asset management service which is effective at a strategic, operational and technical level that can ensure the Council's portfolio is statutory compliant, fit for purpose, cost efficient and in the context of the commercial portfolio contributing to the Council's revenue budget by maximising income from its property holdings.
