## **Section VI. Complementary information**

### **VI.3) Additional information**

City has decided not to award a contract. This is because during the procurement, it was realised our requirements were more complex than had originally been anticipated. We do not have confidence that a contract awarded under this procurement would best serve our objectives. The scope of our requirements changed and we now envisage combining the exercise to replace the ERP system with a wider programme of IT modernisation rather than conducting separate exercises, which may lead to duplicated expense and challenges relating to interoperability. We intend to plan for a new procurement in the very near future on that basis
