This Contract will provide in-service support including provision of spares, repairs, calibration services, technical documentation management, quality management and safety management to the Fire-Set and Charge Requirement until March 2029 (inclusive of Options).

II.2.5) Award criteria

Price

II.2.11) Information about options

Options: Yes

Description of options

There will be options to extend the Contract duration by a further 2 years to a total Contract duration of 5 years.

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No

Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Negotiated procedure without publication of a contract notice

- The products involved are manufactured purely for the purpose of research, experiment, study or development
- The works, supplies or services can be provided only by a particular economic operator for the following reason:
 - absence of competition for technical reasons

Explanation:

The Specialist EOD&S, Exploitation and Countermeasures Project Team, part of the United Kingdom Ministry of Defence (The Authority) intends to award a 3-year contract with 2 Option years to Teledyne Reynolds to provide In-Service Support to Fire Set & Charge with an estimated value of £950k (Ex VAT).

This system is a two part system built of a Fire Set and Charge and sits within the Disablement portfolio under Special Project and Future Search. It provides a multi-user capability for general Explosive Ordnance Disposal (EOD) contingency operations and for Specialist Users. The System is only used by UK Armed Forces and is bespoke to the UK MOD.

The previous support contract is due to expire March 2024. A new support arrangement is required to ensure support is provided throughout the remaining service life of the equipment. The Authority is negotiating a new contract for in-service support, which includes provision of spares, repairs, calibration services, technical documentation management, quality management, safety management. The contract will enable support of the equipment through to 31 March 2029 inclusive of Option Years.

Only Teledyne Reynolds have the proven expertise, knowledge and experience to manufacture consumable spares, maintain and repair this equipment. Awarding the Contract to a third-party supplier would present the MOD with a capability gap as the equipment will need to be removed from service whilst safety and assurance trials are undertaken to ensure the equipment is safe to use and fit for purpose. It is estimated that it would take a minimum of 12 months to contract for a new supplier, develop equipment understanding, completion of trials, evidence and reporting and finally acceptance, or not, back into the hands of the users. This time impact would introduce a capability gap which

would have an unacceptable operational impact and introduce unacceptable risk in terms of delay.

IV.1.3) Information about a framework agreement

The procurement involves the establishment of a framework agreement

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: No

Section V. Award of contract/concession

Contract No

710172450

Title

In-Service Support of Fire-Set and Charge

A contract/lot is awarded: Yes

V.2) Award of contract/concession
