Scope

Description

Scada (Supervisory Control and Data Acquisition) is an industrial control system designed to monitor factory and plant operations. BMS (Building Management System) is a computer-based system to control and monitor the building mechanical and electrical equipment. The maintenance and support services are intended to address any issues related to the control system components. These services include essential software maintenance, technical support and services to help protect and extend the software, ensuring smooth operations.

The Scada and BMS systems was designed by EJ Peak, trading as March, they also provide LondonEnergy the support and maintenance for the SCADA and BMS systems at EcoPark South.
