Explanation:

The market assessment has only identified a single provider who has the comprehensive range of readily available care pathways that can be localised to improve the needs of patients. This tool has over 1000 clinical pathways and will support the organisation with access to the latest global evidence and best practise by providing guidance on clinical assessments and treatments available. This will provide rapid and intensive support to how the delivery of care is integrated and can better secure the various care needs of patients. The tool contains over 600 conditions across 60 health systems across Australia, UK and New Zealand. By using this platform and joining an international community of collaborators, the Trust can easily and rapidly share established and tested content and also support the learning from shared ways of clinically collaborating and feedback from the wider healthcare community.
