- Identification of which different researchfish records actually refer to members of the same simple patent family.
- For each patent family with at least one record in researchfish, identification of the other members of the same family that are not recorded in researchfish.
- the original priority date
- the jurisdictions covered.
- the application status in each jurisdiction
- the original applicant and original and current assignees
- a robust estimate of current value
- an evidence-based assessment of economic impact to date
- For the portfolio as a whole, interactive analysis of patent family technology area classification, including flexible options to present/export of the data via tables and charts.
- the ability to search for patents applied for by specific organisations.
- the ability to track the 'IP evolution' of spin-out companies linked to UKRI funding.
- The ability to refresh any of the above analyses 'at will'.
- The provision of an API access to allow the automation of processing for funding assurance and due diligence in Innovate.
