Scope: Co-production coordination

The provider will develop the pathway's embedded co-production model ensuring that service users and people with lived experience are at the heart of decision making and service delivery across the region, which will be led by experienced co-production professional/s.

- o Address specific barriers to support or access needs for clients with multiple complex needs. This may include reimbursement of transport costs or interpreter provision.
- o Expand current service offer to include specialist trauma interventions and processing such as Eye Movement Desensitisation and Reprocessing (EMDR) and Narrative Exposure Therapy (NET).
