The Wallace Collection Masterplan - Building Services Engineer and Sustainability Consultant

II.1.2) Main CPV code

- 71315210 - Building services consultancy services

II.1.3) Type of contract

Services

II.1.4) Short description

The Wallace Collection (TWC) is seeking to appoint a Building Services Engineer and Sustainability Consultant for a significant re-development project as part of TWC's Masterplan. The completion of a full RIBA Stage 4 design is required, along with RIBA Stage 5/6/7 services. Tenderers must demonstrate sufficient capability to support the procurement and delivery of the project at the Wallace Collection in Westminster, London.

The Building Services Engineer's scope includes the design of mechanical, electrical, and public health services, and coordinating below-ground drainage with the Structural/Civil Engineer. It also involves integrating electrical and data cabling specified by specialist consultants (e.g., IT/AV, security, fire, and catering) and addressing catering-related electrical, ventilation, and drainage needs. Additionally, the scope covers vertical transport systems and ambient/emergency lighting, ensuring alignment with architectural and exhibition lighting designers' requirements.

The Sustainability Consultant will lead the development and implementation of the project's sustainability framework, ensuring alignment with the Client's objectives and compliance with relevant legislation and standards. The scope includes acting as the BREEAM Accredited Professional and Assessor, guiding the integration of sustainability measures into the design and construction phases, and coordinating with stakeholders, including the BRE and planning authorities.
