### **Scope**

### **Reference**

2023 1034

### **Description**

This framework will look to procure and implement a modern, scalable, and data-driven Asset Investment Planning and Management (AIPM) system that enables Anglian Water to make optimised, risk-informed investment decisions across our asset base.

The solution must support long-term planning (up to 40 years), cost-benefit optimisation, risk modelling, and integration with existing digital architecture.

The anticipated contract will run for a period of 8 years. The total estimated expenditure over the eight-year duration is £2.9 million

## **Engagement**

### **Engagement deadline**

25 July 2025

### **Engagement process description**

Interested suppliers are invited to participate in this pre-market engagement exercise by completing a short questionnaire. The purpose of this exercise is to gather feedback from the market to help inform and shape the potential procurement strategy and scope of the upcoming framework.

All responses must be submitted via the Scanmarket Portal. To access the questionnaire, suppliers must first register on the portal (if not already registered). Once registered, participants will be able to download the engagement documents, review the outline strategy, and respond to the questions provided.

Please note that this is a non-competitive, pre-procurement exercise, and participation does not form part of any subsequent evaluation process. However, supplier insights will play an important role in helping to refine the approach and ensure the proposed framework is commercially attractive, viable, and fit for purpose.
