II.2.4) Description of the procurement

The provision of these cameras will provide real-time and historical viewing capabilities, enhancing the safety of passengers at busy locations, including the newly implemented super stops. The cameras are designed to be easily deployable, allowing them to be moved as needed to different locations. They will be fully integrated with the existing PCC CCTV system, ensuring seamless monitoring and enhancing overall safety and security in these areas.

The project aims to improve safety at busy bus stops, making them more secure for passengers and encouraging greater access to public transportation. By equipping high-traffic stops with these advanced cameras, we can deter potential safety issues and respond to incidents more effectively. The cameras will contribute to safer and more accessible public transportation, aligning with the broader goal of improving the city's bus services under the Bus Service Improvement Plan (BSIP).

Installation of the cameras will be undertaken internally by the Council.
