II.2) Description

II.2.2) Additional CPV code(s)

- 51540000 - Installation services of special-purpose machinery and equipment

II.2.3) Place of performance

NUTS codes

- UKH14 - Suffolk

II.2.4) Description of the procurement

The proposed development is the replacement of the existing media filtration system with a micro filtration system and associated equipment. The contractor shall provide a treatment plant to meet the specification. The specification provides prospective contractors with the necessary details to replace the existing media filtration system with a new ceramic microfiltration system, including any required associated equipment. The contractor is expected to retain as much of the existing plant as feasible, including strainers, circulation pumps, heat exchangers, dosing controller, and dosing tanks. Additionally, new pipework, chemical injectors, and a magnetic flowmeter will be required. The new ceramic microfiltration system must be designed to effectively treat water at a flow rate of 270 m³/hr and include all necessary associated equipment. The contractor's proposal should also include a commitment to monitor and assess operational savings achieved through the new filtration system over the first 12 months. Works to commence as soon as possible with works to be completed before or as close as possible to the end of March 2025.

II.2.5) Award criteria

Price is not the only award criterion and all criteria are stated only in the procurement documents

II.2.6) Estimated value

Value excluding VAT: £200,000

II.2.7) Duration of the contract, framework agreement or dynamic purchasing system

Start date

3 February 2025

End date

31 March 2025

This contract is subject to renewal

No

II.2.10) Information about variants

Variants will be accepted: No

II.2.11) Information about options

Options: No

II.2.13) Information about European Union Funds

The procurement is related to a project and/or programme financed by European Union funds: No
