Reference number

DN754765

II.1.2) Main CPV code

- 45000000 - Construction work

II.1.3) Type of contract

Works

II.1.4) Short description

The Government of Jersey is seeking a Main Works Delivery Partner (MWDP) to complete the design and construction of the Overdale Acute Hospital as part of the NHF Programme.

The focus of this procurement is the design, construction, testing and commissioning of a new Acute Hospital in St Helier on the site known as Overdale.

Programme Overview

The NHFP's primary objective is to deliver modern, fit for purpose secondary health and care facilities estate for Jersey in line with the decisions of the States Assembly and the States of Jersey Common Strategic Policy.

The key objectives of the wider NHF Programme are:

- To produce a multi-site health and care estate which will enable a high-quality healthcare provision that delivers efficient, effective, timely and accessible care for all service users and, furthermore, delivers the best possible experience for service users, visitors, and staff.
- To deliver facilities that are safe, compliant, flexible and the right size for the future delivery of clinical and other services, and enables service transformation.

- To deliver new healthcare facilities that ensures the financial sustainability of the health economy.
- To deliver facilities that contribute to building a thriving community and well-being of staff and patients with positive socio-economic and environmental impacts.

The Programme has significant political, clinical, and local support, and benefits from an optimised governance model.

Overdale Acute Project

The wider NHF programme includes building the Acute Hospital at Overdale and other projects at the existing Jersey General Hospital site for ambulatory services, and the development of mental health services within the wider health estate. As part of the programme, demolition and site clearance works have been completed at the site at Overdale in preparation for the construction of the new Acute Hospital.

It is intended that we appoint a single MWDP for the Acute Hospital at Overdale who will design and construct a new circa 47,500m² Acute Hospital with associated services and external spaces. It will require a MWDP to provide a full suite of services through the pre-construction, construction, and commissioning stages through to Practical Completion.

The Acute Hospital will include the Emergency Department, Theatres, Inpatient wards and Women's and Children's inpatient services with associated infrastructure, including surface landscaped car parking.
