Section IV. Procedure

IV.1) Description

IV.1.1) Type of procedure

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

Calibration of RPI ensures that all instruments provide accurate data (as required by Regulation 20, Ionising Radiations Regulations) to maintain a safe working environment. The current Gamma Calibration Facility system (both hardware and software) is an aging asset; the entire system is no longer supported by the original manufacture. Due to the age of the equipment, degradation of sources and lack of IT updates, and with no back-up system available, there is an increasing risk of failure, therefore urgent remedial action is required.

To maintain a compliant, calibrating capability an X-ray system is required, and the identified supplier is the only UK/European supplier capable of directly providing a compatible system suitable for RPI calibration in the required timescales.

IV.1.8) Information about the Government Procurement Agreement (GPA)

The procurement is covered by the Government Procurement Agreement: Yes
