Description

Background:

Castle Cary railway station is a key transport hub in Somerset, connecting the town and surrounding rural areas to London, Exeter, and Plymouth via the Great Western Main Line. The project is in GWR's programme for design and delivery within this fiscal year 2025.

Despite its small size, the station provides essential amenities including a ticket office, waiting shelters, cycle storage, and parking to both the east and west.

The existing station building has historical heritage value and is in need of refurbishment to support future passenger growth, improve staff facilities and align with GWR's customer experience standards.

The project has recently completed PACE 1 (ES1-ES3) and is currently progressing through PACE 2 (ES4).

This Procurement sets out the requirement to appoint a contractor to deliver works from PACE 2 (ES5) through to the end of PACE 4 (ES8) under a JCT Intermediate Works Contract with contractor design responsibility.

The scope of works includes a heritage sensitive internal refurbishment of the ticket office building that needs to:-

- Enhance ergonomics,
- Improve staff working conditions,
- Elevate customer experience, and
- Optimise station operations.

Contract Type:

PACE ES5 to ES8 Construction works: JCT Intermediate Works Contract with Design & Build

Total value (estimated)

- £625,000 excluding VAT
- £750,000 including VAT

Above the relevant threshold

Participation

Legal and financial capacity conditions of participation

It is a pre-requisite of contract award that the successful applicant must register in full with Achilles link-up.

GWR has partnered with Achilles, one of the world's largest service providers of global supply chain risk management solutions, to introduce a new global supplier registration and assurance solution.

Achilles collects and manages the data that will serve as our main source of up-to-date and verified supplier information to support Supply Chain and Procurement decisions.

For more information please contact Achilles at ben.keen@achilles.com

Technical ability conditions of participation

Potential Contractor will have to provide details of up to three contracts ("case studies") that demonstrate your technical ability and experience in providing the goods and services that are required by GWR in this tender - working on National Rail property and experience with managing work within an active train station.

Please note: the relevant project examples (e.g. similar work programmes within the rail sector, working within live operational Station environment(s) etc) that you have undertaken in the last 5 years should demonstrate your capability to fulfil this requirement.

Particular suitability

Small and medium-sized enterprises (SME)
