Lot 1. Groundworks

Description

This Lot is for the skilful manipulation of peat and other wetland soil types with tracked excavators. A range of restoration techniques are required, including raising and stabilising

water levels, re-vegetating of bare peat, stopping peat erosion and cutting of dominant vegetation on Welsh Peatlands. The methods proposed relate to un-forested and afforested upland blanket bog and lowland bogs and fens.

Lot value (estimated)

- £14,000,000 excluding VAT
- £16,800,000 including VAT

Framework lot values may be shared with other lots

CPV classifications

- 77000000 - Agricultural, forestry, horticultural, aquacultural and apicultural services
- 45112000 - Excavating and earthmoving work

Same for all lots

Contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot 2. Vegetation / Scrub Management

Description

This framework Lot includes both chemical treatment and manual removal of scrub across often large open areas of peatland. NPAP require a flexible and skilled contractor base to

carry all aspects of the works which includes to remove any encroaching scrub and tree species from the areas of deep peat that have managed to establish as a result of the damaged hydrology. The management of deciduous and coniferous tree species will prevent further drying of the peat body.
