Scope

Description

HMRC require a universal DevOps solution, providing end-to-end automation and management of binaries and artifacts through the application delivery process improving productivity across HMRC's development ecosystem. HMRC are planning to consolidate multiple siloed software instances across CDIO, ECS, DPS, EIS and B&T/CDS into SaaS based platforms. HMRC requires freedom of choice supporting 25+ software build packages, all major CI/CD (Continuous Version 1.0 3 Integration and Continuous delivery/deployment) platforms, and DevOps tools HMRC already use. This is focusing on the need to procure the following licenses for the JFrog Binary Repository and Software Contextual Analysis software. License requirement: Cloud Enterprise+ 2 SaaS Platforms True-Up Consumption.

Yes

Procedure

Procedure type

Direct award

Direct award justification

- Single supplier - intellectual property or exclusive rights
- Single supplier - technical reasons

Single supplier - intellectual property or exclusive rights

Single supplier - technical reasons

JFrog is a key piece of software for the organisation as it is used to store manage and distribute software packages and artifacts throughout the development lifecycle.

Moving to an alternative solution would cause significant disruption and risk to the authority. This would create disproportionate technical and resource challenges that

would impact business operations and not demonstrate commercial value or provide the most economically advantageous outcome
