Tender

CEFAS25-80 ITT for bathymetric surveys at Sizewell C for the BEEMS programme

CENTRE FOR ENVIRONMENT, FISHERIES AND AQUACULTURE SCIENCE

UK4: Tender notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-043170

Procurement identifier (OCID): ocids-h6vhtk-056661

Published 25 July 2025, 2:29pm

Scope

Description

The BEEMS (British Energy Estuarine and Marine Studies) programme is funded by Sizewell C Limited. Through this programme, Cefas provide authoritative scientific information on the marine and transitional waters in the vicinity of potential new build nuclear power stations and require the Supplier to deliver the elements described below. The purpose of this project is to provide bathymetric data at Sizewell to assess the geomorphological changes of the region, hence contributing to the ongoing monitoring of the Sizewell Coastline. These surveys are a regulatory requirement under the Development Consent Order's (DCO) conditions and the Coastal Processes Monitoring and Mitigation Plan (CPMMP). Cefas anticipate 4 - 6 Multibeam Echosounder (MBES) bathymetric surveys to IHO Special Order (at a minimum) within the Greater Sizewell Bay (GSB) for a 12-month period between October 2025 and September 2026 (with the option to extend for up to 4 additional years), roughly following a quarterly schedule with the potential for additional surveys subject to requirements. Exact survey dates will be agreed between Cefas and the supplier during the pre-survey kick off meetings, however the timings for surveys are dependent on construction schedules so may be subject to change at short notice. We currently expect the first survey to be required in October/November 2025, with following surveys in approximately January 2026, April 2026 and July 2026.

Total value (estimated)

- £500,000 excluding VAT
- £600,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 22 September 2025 to 21 September 2026
- Possible extension to 21 September 2029
- 4 years

Description of possible extension:

Up to 3 x further periods of 12 months each

Description of risks to contract performance

Prolonged Adverse Weather Due to tidal limitations on the surveys, prolonged adverse weather could impact the ability to obtain the dataset for a specific month. This could result in additional costs and/or contract extension in order to meet the requirements. Unable to address the risk upfront as weather is beyond control of Buyer or Supplier. Proportionate mitigation for some weather risk is provided for in the Contract. Risk assigned to both parties. Prolonged Adverse Weather. Due to tidal limitations on the surveys, prolonged adverse weather could impact the ability to obtain the dataset for a specific month. This could result in additional costs and/or contract extension in order to meet the requirements. Unable to address the risk upfront as weather is beyond control of Buyer or Supplier. Proportionate mitigation for some weather risk is provided for in the Contract. Risk assigned to both parties. Change in frequency of survey requirements. Due to changing requirements from Sizewell C, frequency or timings of surveys could change. This could result in additional costs in order to meet the requirements. Unable to address the risk upfront as neither Buyer or Supplier has control over the Sizewell C project planning or regulatory requirements. Proportionate mitigations provided for in the Contract. Risk assigned to Buyer.
