Contract

## **SE1193B Investment Technology Implementation LOT 2**

Sport England

UK7: Contract details notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-044488

Procurement identifier (OCID): ocds-h6vhtk-04fb96 ([view related notices](#))

Published 30 July 2025, 5:17pm

### **Scope**

#### **Description**

Sport England is a lottery distributor, administering and awarding approximately £300m per annum (£100m exchequer and £200m lottery). The funds are distributed across the sport and physical activity ecosystem, a complex network of over 100,000 organisations of different sizes and types. This network of organisations provides the opportunities that already underpin the activity habits of millions of people and the athletes that progress through talent development pathways.

Having a fit for purpose technology system for investment administration is therefore essential for Sport England to deliver its strategic ambitions and role as a funding distributor.

The technology system underpins a substantive part of Sport Englands operation, and as a result needs to balance key operating tensions including:

Strategy ambitions and stakeholder expectations: The launch and continued support for Uniting the Movement signals both the sector engagement and expectations for delivery of the strategy including ease of access to funding.

Financial operating constraints: Sport England operates within administrative constraints

impacted by income. Maximising efficiency and productivity in investment will enable effective delivery within the constraints.

Government functional standards and best practice: Rightly government require standards to be achieved for grant administration including counter-fraud. Sport England has established investment management - any change must not compromise standards.

Continuity of operation and delivery: As Sport England existing commitments and necessary ambitions require delivery scale and cadence to be maintained throughout any change.

Alignment with future target operating model: Finally, any improvement in technology needs to align, and have the ability to, adapt to future operating structures and priorities.

Proof of Concept Delivery: A limited time period Proof of Concept (PoC) has recently been delivered prior to this phase. This has demonstrated the approach and functionality can be successful, and the build created will be extended to form the basis of the next phase of development. The PoC contained some limited functionality for the investment management journey in the system. It is deployed on Azure using Azure App service to manage Docker containers, database is PostgreSQL, API backend is asynchronous Python / Starlette, front end is in React with backend for frontend pattern based on Remix.

This procurement is split into four (4) Lots. Requirements are outlined by Lot below:

### 3.2 Lot 2 - Core Developer

## **Commercial tool**

Establishes a framework

---

## **Lot LOT 2. Core Developer**

## Description

- Core Functional Product Build: End-to-end development of the product functionality.
- Solution Design and Problem Solving: Interpret organisational requirements, solve complex challenges, and collaborate closely with business users and stakeholders.
- Feature-Related Technical Infrastructure: Develop system architecture, and integration with non-feature related development of Lot 1.
- Commercial Proposition: Potential to extend value of the system for future commercial proposition with similar organisations.

---

## Framework

### Maximum percentage fee charged to suppliers

0%

### Framework operation description

Prices per service as listed on rate card

### Award method when using the framework

Without competition

### Contracting authorities that may use the framework

Establishing party only

---
