Request for Information: Enterprise Networks, Telephony and Low Earth Orbit Capabilities

NATIONAL GAS TRANSMISSION PLC

UK2: Preliminary market engagement notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-044490

Procurement identifier (OCID): ocds-h6vhtk-056990

Published 30 July 2025, 5:21pm

Scope

Description

National Gas Transmission owns and operates Britain's National Transmission System (NTS) for gas. This complex matrix of pipelines transports gas from its points of entry to power stations, industrial plants, storage facilities and to the local Gas Distribution Networks that take gas into homes and businesses, as well as overseas via interconnectors. The NTS comprises around 5,000 miles of pipeline, more than 60 compressors at 21 compressor stations and more than 500 above-ground installations. It enables us to ensure security of supply by transporting gas to wherever it's needed, safely and reliably. Every year, the National Transmission System (NTS) for gas quietly and efficiently delivers up to three times the energy transported by the electricity grid.

National Gas Transmission is looking to the future by developing the hydrogen transmission system of tomorrow - building the capability and flexibility required for a clean energy future. Our gas transmission specialists are creating the infrastructure to transport low-carbon hydrogen as a replacement for natural gas, and to transport carbon dioxide for Carbon Capture and Storage (CCS). By applying our expertise to develop the energy systems of the future, we are proud to play a leading role in delivering the UK's net zero ambitions.

As a growing organisation within the UK we are now looking to review the market capabilities for our enterprise networks, telephony and advancing technologies such as low earth orbit connectivity. National Gas are considering our national strategy for these capabilities and will be using this information to understand what the market can provide in relation to our requirements and future business needs.

Please complete the following survey ideally by Friday 8th August 2025.

Contract dates (estimated)

- 2 January 2026 to 1 January 2029
- Possible extension to 1 January 2031
- 5 years

Main procurement category

Services

CPV classifications

- 32412000 - Communications network
- 32413000 - Integrated network
- 32415000 - Ethernet network
- 32416000 - ISDN network
- 32417000 - Multimedia networks
- 32420000 - Network equipment
- 32430000 - Wide area network
- 32510000 - Wireless telecommunications system

- 32520000 - Telecommunications cable and equipment
- 32530000 - Satellite-related communications equipment
- 32550000 - Telephone equipment
- 32570000 - Communications equipment
- 50312300 - Maintenance and repair of data network equipment
- 50312310 - Maintenance of data network equipment
- 50312320 - Repair of data network equipment
- 72000000 - IT services: consulting, software development, Internet and support

Engagement

Engagement deadline

15 August 2025

Engagement process description

Our aim is to leverage market expertise alongside our internal insights to continue developing our strategy that meets both our operational needs and compliments the market's service capabilities. We believe that the supplier's input in this early dialogue is crucial to the success of this initiative.

We are conducting this RFI exercise via Microsoft Form - Please aim to complete the form (link below) by Friday 8th August although the form will remain open to the 15th August

<https://forms.office.com/e/4YpXRCJ00N>

If you have any issues with the link please contact

box.procurement@nationalgas.com - with the Reference: Networks RFI Query

Any future opportunities or stages will be launched via Achilles Utilities Vendor Data Base Platform (<https://www.achilles.com/uvdb/>) UVDB is a community-driven compliant prequalification system designed for regulated utilities in the UK and the wider UK utilities market. It is a collaborative environment where utilities companies and suppliers work together to ensure high standards and compliance with legislative requirements . With an independent chair and equal representation across all utilities, UVDB promotes inclusivity and transparency, making it a trusted platform for both large enterprises and SMEs alike.

Therefore: - If membership costs are prohibitive for your organisations involvement in future opportunities please get in touch with us to discuss - box.procurement@nationalgas.com ref Network RFI Query
