Scope

Description

SSEN are the electricity Distribution Network Operator (DNO) responsible for delivering power to 3.8 million homes and businesses and homes across central southern England and the north of Scotland. We serve some of the most diverse and unique geographies across the UK, and keep customers and communities connected whilst developing the

flexible electricity network vital to achieving net zero.

Our North of Scotland licence area (SHEPD) covers 25% of the UK land mass but is most sparsely populated Distribution Network Operator (DNO) in Great Britain, with roughly 14 customers per square km. It includes 59 remote island communities supplied and interconnected through 110 subsea cables with the combined length of 454km. We currently own and operate seven Distributed Embedded Generation (DEG) & 1 Thermal Embedded Generation (TEM), sites which provide continuity of services if the cables supplying the islands are on outage or have faulted TEM sites currently operate 24/7 as the main source of power for Shetland but is scheduled to be a standby site in the future. Currently diesel-powered units were established in the 1950's before the use of subsea cables when on outage and following faults, especially to island communities.

We are looking for supplier's who are capable to provide support across the DEG & TEM sites for mechanical works this will include welding, fabrication, spares and tank maintenance. This can include works across -

- Fabrication
- Pipe welding
- Structural welder
- Pipe Fitting
- Mech fitting
- Tank Maintenance
- Specialist Welding
- Structural Steelwork

Commercial tool

Establishes a framework

Total value (estimated)

- £9,000,000 excluding VAT
- £10,800,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 28 November 2025 to 1 September 2029
- Possible extension to 1 September 2032
- 6 years, 9 months, 4 days

Description of possible extension:

4 one year extension periods will be included.

Lot constraints

Maximum number of lots a supplier can bid for: 1

Maximum number of lots a supplier can be awarded: 1

Description of how multiple lots may be awarded:

1

Lot 1. Lerwick & Kirkwall

Description

Providing Framework services for Lerwick and Kirkwall Power Station

Lot value (estimated)

- £9,000,000 excluding VAT
- £10,800,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot 2. Loch Carnan & Barra

Description

Providing framework services for Loch Carnan and Barra power station

Lot value (estimated)

- £9,000,000 excluding VAT
- £10,800,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot 3. Battery Point & Arnish

Description

Providing Framework services for Battery point and Arnish power station

Lot value (estimated)

- £9,000,000 excluding VAT
- £10,800,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.

Lot 4. Bowmore & Tiree

Description

Providing framework services for Bowmore & Tiree Power Station

Lot value (estimated)

- £9,000,000 excluding VAT
- £10,800,000 including VAT

Framework lot values may be shared with other lots

Same for all lots

CPV classifications, contract locations and contract dates are shown in the Scope section, because they are the same for all lots.
