UKSAC25_0067

Description

The National Space Operations Centre (NSpOC) orbital analysts require specialist software in order to perform their roles. One specialist software package they need is STK and ODTK. A maintenance and support fee are required to update the software to the latest version and transfer the software to their newly managed machines.

The software is only available from distributor in the UK who holds the licence to it. There are no other products currently available on the market that fulfil the highly specialist functions set out above.
