Scope

Description

Bi-borough Adult Social Care (RBKC & WCC) are exploring how to transform their approach to technology enabled living (TEL). We are seeking to understand the key opportunities, the most effective ways of realising those opportunities, the costs involved in undertaking transformation and fundamentally the return on investment.

We are exploring the affordability of utilising specialist expertise from the marketplace to make this happen. We are seeking consultancy insight on costings, timings and the key activities that will be required for:

- 1) Developing the financially optimum operating and procurement model for the Bi-borough setting. A model that sets out a comprehensive and systematic way of prescribing, distributing, monitoring, collecting and recycling of TEL/TECH devices. A model that ensures optimum data insights and facilitates evidence led service decisions.
- 2) Developing the robust financial case for adopting the recommended model, setting out the immediate and long-term costs and the expected return on investment through adopting the recommended model.
- 3) Identify and deliver on short term cashable saving opportunities through the deployment of TEL/TECH devices.

The intelligence provided will inform internal decision making as to the affordability of consultancy support with the anticipation that this enables an informed budget for a formal sourcing exercise.

If your organisation is interested in this area, please complete the the short questionnaire provided. The information provided will help shape a future procurement exercise to secure the services.
