JB/ICT/LCC/25/1917

## Description

A digital front door platform is designed to streamline and enhance the way residents and businesses interact with services that the Authority provides. The future platform will deliver the following strategic ambitions:

- Easy, seamless experience whether engaging by phone, face to face, social media, AI chat or via a range of resident facing applications and forms.
- Mobile friendly, easy access to advice, information, and support about our services at a time to suit our residents.
- Opportunities to feedback about their digital journey and the design of our resident facing services.
- An automated telephone payment system which allows users to make payments over

the phone or online without needing to speak to an agent.

- Receive a consistently effective digital service without having to tell us more than once.
  - Ability to capture nondigital interactions where residents have chosen to use nondigital routes.
  - Real time access to updates about a service request
  - Promotes an inclusive digital service.
  - Accessibility is embedded into the fabric of our solution so that residents with additional needs can engage with us digitally.
  - Seamless signposting to the wider local government community without having to understand the difference between county, district, or parish level services.
  - Ability to communicate in a non-English first language.
  - An effective, timely and empathic response to an enquiry or service request
  - Assurance that information we hold is safe and secure
-

## **Options**

The right to additional purchases while the contract is valid.

The Council anticipates that, during the term of the contract, there may be a requirement for additional purchases and enhancements to ensure the continued effectiveness, scalability, and relevance of the solution. These may include, but are not limited to:

- Upgrades to existing systems or solutions to maintain compatibility with evolving technical standards, such as PCI DSS, or security requirements;
- Procurement of new modules or functionalities that extend the core capabilities of the original solution, provided they remain within the intended scope of the contract;
- Specialist consultancy or development services to support implementation, integration, or optimisation of the solution, and future upgrades, in response to changing operational needs;
- Integration of evolving technologies, such as artificial intelligence (AI) and automation, to enhance performance, efficiency, or user experience, where such integrations are consistent with the original purpose of the contract.
- Purchase additional licences, storage and similar already covered by the Contract but to expand the needs.
- To support the Council during any future reorganisation, such as Devolution and Local Government Reorganisation (LGR)
