## **ALM Platform- Gitlab SaaS Migration**

HM Revenue & Customs

UK5: Transparency notice - Procurement Act 2023 - [view information about notice types](#)

Notice identifier: 2025/S 000-046913

Procurement identifier (OCID): ocds-h6vhtk-05835a ([view related notices](#))

Published 7 August 2025, 1:30pm

### **Scope**

### **Description**

HMRC require a solution which can develop, share and version control rigorously assured code to produce robust, reproducible analysis which can also allow for Collaboration, internal transparency coupled with security. HMRC are planning to consolidate multiple siloed software instances across CDIO, ECS, DPS, EIS and B&T/CDS into SaaS based platforms. It is key that all groups in HMRC are on the same platform as other analysts, data scientists and coders in HMRC, to ensure integration and compatibility and therefore efficient use and reuse of analytical components across the department. This includes Gitlab Dedicated SaaS for 4000 users, large Infrastructure and Management

### **Contract 1. ALM Platform- Gitlab SaaS Migration**

## **Supplier**

- GITLAB UK LIMITED

## **Contract value**

- £11,826,872.40 excluding VAT
- £14,192,246.88 including VAT

Above the relevant threshold

## **Earliest date the contract will be signed**

18 August 2025

## **Contract dates (estimated)**

- 1 September 2025 to 31 August 2028
- 3 years

## **Main procurement category**

Services

## **CPV classifications**

- 72000000 - IT services: consulting, software development, Internet and support

## **Contract locations**

- UK - United Kingdom

---

## Other information

### Conflicts assessment prepared/revised

Yes

---

## Procedure

### Procedure type

Direct award

### Direct award justification

- Single supplier - intellectual property or exclusive rights
- Single supplier - technical reasons

Single supplier - intellectual property or exclusive rights

Single supplier - technical reasons

Gitlab is a key piece of software for the organisation as it is used for software development, allowing teams to plan, build, test, and deploy code collaboratively in a single application. Moving to an alternative solution would cause significant disruption and risk to the authority. This would create disproportionate technical and resource challenges that would impact business operations and not demonstrate commercial value or provide the most economically advantageous outcome
