#### **II.1.4) Short description**

NaSH, the National Sexual Health System for Scotland has been providing digital patient management services to clinicians in Scotland since 2008. NSS, on behalf of the NHS Boards using the system, wish to research the market to understand if new options are available and where their current system sits in the market.

The sexual health services provided by NHS Scotland must be responsive to the needs of the population and the current IT solution provides a full electronic patient record (EPR) for patients registered within it. This supports integrated specialist sexual health services including genitourinary medicine, sexual and reproductive health, abortion services, counselling, psychosexual medicine, HIV care and registries for hepatitis B & C and gender.
