NJ-08-25-WMG-EDS-GW

Description

The University of Warwick has a requirement for to improve the chemical mapping capability on the Scios dual beam to provide it with a new state-of-the art capability. This system is used extensively for characterising battery-based materials and the new detector will enable accurate quantitative high-speed chemical mapping of large sections of these materials at low beam currents.

In order to express interest in this opportunity please go to the University of Warwick In-Tend supplier portal (<https://in-tendhost.co.uk/universityofwarwick>).

The University of Warwick is not a contracting authority for the purposes of the Public Contracts Regulations 2015 (as amended) or the Procurement Act 2023 and associated Procurement Regulations 2024 (and as may be amended from time to time) and its procurement activities are not subject to the requirements set out therein or the obligations under the European Public Procurement Directives, including the European

Remedies Directive. Should the University advertise contracts in the Official Journal of the European Union, Find-A-Tender platform or other contract opportunity advertising site or platform, this is at the sole discretion of the University and is undertaken on a voluntary basis with no implied obligation to comply with the procurement legislation.
