Body governed by public law

**I.5) Main activity**

Environment

---

## **Section II: Object**

### **II.1) Scope of the procurement**

#### **II.1.1) Title**

Wemyss Scour Protection

Reference number

CA18/2/1/106

#### **II.1.2) Main CPV code**

- 71300000 - Engineering services

#### **II.1.3) Type of contract**

Services

#### **II.1.4) Short description**

The Site is located approximately 2km north-west of New Row, on the road to Abermagwr. The grid reference for the centre of the site is SN SN716 741.

The spoil tips of the Wemyss mine site lie to the north and south of the Cwmnewydion Road. The Lower Mill Stream is culverted under the road and flows south to its confluence with the Nant Cwmnewydion.

The Lower Mill Stream is eroding the tips on the south side of the road, particularly where it exits the culvert under the road and hits the side of the tip with high velocity. Between October 2024 and January 2025, a section of tip approximately 1m high, 0.5m deep and 4m wide collapsed into the stream.

The works are required to reduce the erosion of the tips. The works comprise laying rock rolls at the toe of the tips in the places where they have been observed to be actively eroding, in accordance with the Mining Remediation Authority drawings

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.1.7) Total value of the procurement (excluding VAT)**

Value excluding VAT: £33,520

## **II.2) Description**

### **II.2.3) Place of performance**

NUTS codes

- UKL1 - West Wales and the Valleys

### **II.2.4) Description of the procurement**

The Site is located approximately 2km north-west of New Row, on the road to Abermagwr. The grid reference for the centre of the site is SN SN716 741.

The spoil tips of the Wemyss mine site lie to the north and south of the Cwmnewydion Road. The Lower Mill Stream is culverted under the road and flows south to its confluence with the Nant Cwmnewydion. The Lower Mill Stream is eroding the tips on the south side of the road, particularly where it exits the culvert under the road and hits the side of the tip with high velocity. Between October 2024 and January 2025, a section of tip approximately 1m high, 0.5m deep and 4m wide collapsed into the stream.

The works are required to reduce the erosion of the tips. The works comprise laying rock rolls at the toe of the tips in the places where they have been observed to be actively eroding, in accordance with the Mining Remediation Authority drawings

### **II.2.5) Award criteria**

Quality criterion - Name: Technical questions / Weighting: 60

Price - Weighting: 40

### **II.2.11) Information about options**

Options: No

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Award of a contract without prior publication of a call for competition in the cases listed below

- The procurement falls outside the scope of application of the regulations

Explanation:

Low value requirement for which quotations were sought and judged against independent criteria

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: No

---
