Tenders may be submitted electronically

Yes

Award criteria

MAT Criteria: (Most Advantageous Tender) this is when a bid is evaluated on a qualitative (non-cost and qualitative (cost)) basis.

The Tender Evaluation will be based on the basis of: Value for Money Index (VFM Index). This approach divides the total score of the non-cost (technical) criteria by the tender cost. It ranks tenders on the quality (represented by the non-cost score) for each NPR of cost. It is simple to calculate, transparent and maximises return on investment. It should be noted that very different solutions can give the same VFM Index and considered equal. Should two or more tenders achieve the same VFM Index score the Authority will select the lowest priced tender.
