Description

The genomic data platform developed through the PATH-SAFE programme is an operational, cross-government capability which provides genomic analytics linked to contextual metadata, visualised in user friendly reports for end-users within partner UK agencies. The platform has been built on proven expertise and infrastructure and has been co-designed using community and end-user expertise to ensure the delivery of value to end users. Ultimately the platform is expected to provide annotations comparable between agencies through standardised best practice analytics and QC thresholds, enabling sharing of data and resources across organisations, and the rapid identification and tracking of foodborne pathogens, clusters and AMR.

The platform was made live in March 2024, equipped with analytics solely focussed on Salmonella spp., and enhanced through FY24/25 to include E.coli and Listeria analytics. Further funding has been secured for FY25/26 to continue development of the platform as part of a National Food Surveillance Programme, seeking to build on previous project

success and prior HMT investment to date. With the platform ready for use, next steps will require deep focus on data integration (i.e. conduiting of data from individual to collective value) to the platform, deployment and further enhancement to support end user needs.

The platform utilises the capability owned by the supplier to complete analyses required to complete this project.

Contract 1. Genomic Data Platform

Supplier

- OXFORD UNIVERSITY INNOVATION LIMITED

Contract value

- £450,000 excluding VAT
- £540,000 including VAT

Above the relevant threshold

Award decision date

12 August 2025

Standstill period

- End: 21 August 2025

- 8 working days

Earliest date the contract will be signed

22 August 2025

Contract dates (estimated)

- 1 September 2025 to 31 March 2026
- Possible extension to 31 March 2027
- 1 year, 7 months

Description of possible extension:

Optional 12 month extension

Main procurement category

Services

CPV classifications

- 73000000 - Research and development services and related consultancy services

Contract locations

- UK - United Kingdom
-
