Scope

Description

Precision CellRad+ Cell Irradiation System is a state-of-the-art benchtop X-ray irradiation platform designed for continuous, controlled cell irradiation. This advanced system provides a safer, costeffective, and sustainable alternative to gamma radioisotope-based irradiation, eliminating the need for isotope handling, storage, and disposal. Its compact design and built-in shielding allow installation directly within the laboratory, without the

requirement for costly infrastructure modifications.

The CellRad+ is simple to operate, requiring no specialised X-ray knowledge, and features an intuitive touchscreen interface with password-protected access. It plugs into any standard A/C outlet and includes an integrated dosimeter with advanced Automatic Dose Control (ADC) for precise dose setting and reproducibility. Automatic warm-up extends tube life, and the system supports remote diagnostics and web-based support from product specialists for minimal downtime.

The system operates across an energy range of 10-150 kV with a maximum current of 6.25 mA, allowing versatile irradiation settings for different experimental requirements. An electrically

operated turntable (2 RPM) ensures uniform dosing, while the integrated closed-loop heat exchanger maintains optimal operational stability. The irradiation chamber (W 12" × D 12" × H 14") accommodates a wide range of sample formats, with a beam coverage of 12" (30 cm) and source-to-sample distance of 17" (44 cm). The system is NRTL certified by Intertek for electrical safety and maintains an Excel-based exposure/user log that can be exported via USB for audit and compliance purposes.

These features make the CellRad+ ideally suited for applications including cancer cell biology, tissue and stem cell research, nanoparticle studies, and immunotherapy investigations.

Total value (estimated)

- £99,000 including VAT

Below the relevant threshold

Contract dates (estimated)

- 15 September 2025 to 15 April 2026
- 7 months, 1 day

Main procurement category

Goods

CPV classifications

- 33111000 - X-ray devices
- 33190000 - Miscellaneous medical devices and products

Contract locations

- UKD3 - Greater Manchester
