Other information

Payment terms

Payments are dependent on certification of the tonnage processed and meeting monthly reporting requirements.

Valid invoices will be paid within 30 days.

Description of risks to contract performance

There are significant known risks that are likely to impact on the financial profile.

The addition/removal of target materials during the contract term will impact on processing and income cost which may be difficult to determine at this stage.

The addition of films will need to be added by 31 March 2027 will risk have financial and processing risk.

Variability and uncertainty in the market availability and pricing of films.

Determination of the most appropriate film collection method.

Waste composition: the nature and composition of the waste will change during the course of the contact due to legal drivers.

Liquid cartons, plastic/aluminium tubes will need to be collected by local authorities by April 2026.

The introduction of the Deposit Return Scheme in October 2027 is likely to significantly reduce the income and may increase the cost of processing because the remaining container mix contains a greater proportion of materials that are less easy to separate.

The price of the deposit is unknown. The extent to which retailers can be geared up at the pace and scale that would be required nationwide are likely to be key factors in determining the impact of the scheme and its impact on the composition.

The introduction of UK Emissions Trading Scheme (UK-ETS) scheme will increase disposal costs.

The legal mechanism for passing the costs of the ETS scheme back to local authorities has yet to be determined, so its impact on the contract cannot currently be determined.

Applicable trade agreements

- Government Procurement Agreement (GPA)

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Competitive flexible procedure

Competitive flexible procedure description

The competitive flexible procedure to be followed will be:

Stage 1: Invitation to tender

Suppliers are invited to submit an initial tender which will be evaluated in accordance with the evaluation criteria. A maximum of five highest scoring suppliers will be invited to a second stage to demonstrate their solution

Stage 2: Demonstration stage

A site visit will be undertaken to view the waste sorting facility. Suppliers may request a trial load to process through their facility to test pricing assumptions and the supplier will do a presentation.

Stage 3: Invitation to submit a final prices

Suppliers will be invited to submit a revised pricing schedule.
