Scope

Description

The Authority is exploring the potential to establish a direct contractual arrangement with a chlorine tablet supplier. The purpose of the contract is to ensure a resilient and prioritised supply of chlorine disinfectant combination tablets with detergent 1.7g NaDCC in the event of a national pandemic or public health emergency. As part of this arrangement, the supplier would be required to hold sufficient raw materials (NaDCC) and packaging components to enable production of circa. 9-30 million chlorine tablets (“materials”). *This volume range is an estimate only and subject to final confirmation at the Invitation to Tender (ITT) stage.

The arrangement would operate independently of the Authority’s existing Chlorine Framework [2024/S 000-039165] and must ensure timely delivery continuity in the event of a national pandemic or public health emergency conditions, including those resulting in UK border closures (“emergency conditions”).

Indicative Requirement

1. Direct Agreement with a Supplier

The Authority intends to enter into a direct contractual agreement with a chlorine tablet supplier. To be considered, a supplier must:

- Own and operate the production machinery used to manufacture the tablets;
- Be able to produce and supply chlorine tablets at scale and on demand;
- The supplier must demonstrate the ability to deliver orders reliably and without delay on a weekly basis to locations within the UK in emergency conditions, including when UK borders may be closed.

2. Emergency Stockholding Requirements

As part of the arrangement,

- The supplier would be required to hold and maintain stock of raw materials (specifically including NaDCC – Sodium Dichloroisocyanurate) and all necessary packaging components;
- Stock must be held specifically for the Authority, clearly designated for its use in the emergency conditions;
- The volume of additional stockholding for the Authority may range between 9-30 million chlorine tablet's worth of raw materials and packaging. This stockholding volume is indicative and subject to confirmation at the Invitation to Tender (ITT) stage;
- All stock must be held physically at the suppliers own controlled facility;
- Materials must not be in transit, at unaffiliated third-party warehouses, or held under consignment arrangements; and
- The supplier must retain full ownership and control over these materials and components.

3. Emergency Supply and Delivery Capability

The supplier must demonstrate the capacity to:

- Deliver chlorine tablets on a weekly basis, without delay to a specified UK depot as instructed by the Authority;
- Maintain delivery capability in border-closed or restricted scenarios; and

- Have the capability to produce and supply approximately 3 million tablets per week under emergency conditions. *This is an estimated volume and not a guaranteed commitment.

4. Contractual Positioning and Priority Access

This contractual agreement will operate outside of the Authority's existing Chlorine Framework.

The Authority must be granted priority access to the materials during any pandemic or emergency conditions period.

The supplier will be expected to sustain continuous supply of the chlorine tablets to the Authority for the full duration of the emergency conditions.

Important Notes

- This is a Pre-Market Engagement notice only and not a call for competition.
- Participation in this PME does not guarantee access to future tender documentation or award.
- Final details and volumes will be confirmed at the ITT stage.
