C27279

Description

NRS currently manages over 200,000 assets, with significant changes expected over the next decade due to future missions, asset decommissioning, and new enabling plants. The data workstream, a critical path in the EAM Transformation Programme, is significantly delayed, jeopardising timelines and benefit realisation.

A key issue is the 12-month delay in piloting and selecting a Data Conditioning and Transformation Tool, which is essential for creating a coherent and consistent asset data set across the organisation. Additionally, there is a misalignment between the platform procurement award (May 2026) and the integrator going to market (June 2027), with the data workstream currently seen as the cause of this hold.

The programme is now operating beyond the executive risk appetite, with delays impacting both interim and full benefits. A major challenge is the lack of clarity between

the current (AS IS) and future (TO BE) asset data

Total value (estimated)

- £400,000 excluding VAT
- £480,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 8 September 2025 to 31 August 2026
- 11 months, 23 days

Main procurement category

Services

CPV classifications

- 79414000 - Human resources management consultancy services

Engagement

Engagement deadline

20 August 2025

The engagement was carried out before this notice was published.

Engagement process description

The strategy and preferred option for this procurement was to utilise CCS RM6288 Statement of Work service line with AMS. However, the final contract signatures for the NDA Group under RM6288 is still outstanding. Given this delay, we are now exploring a direct engagement to secure the services.

Participation

Particular suitability

Small and medium-sized enterprises (SME)

Submission

Publication date of tender notice (estimated)

1 September 2025
