Description

The Council is looking to purchase three new four-wheel drive tractors . The Machines are primarily used for Trunk Road Cyclic maintenance carrying out grass cutting operations and occasional hedge trimming to ensure roads are kept in a safe and serviceable condition throughout the County of Powys. This is undertaken by the Council under contract on behalf of North and Mid Wales Trunk Road Agency . For these functions, an out-front flail and rear hedge brusher is utilised, therefore visibility is key.

However, machines are also used for other activities including ditching and as back-up for the Council's winter maintenance activities between October and March.

Due to the locations in which the Machines operate, the size of the Machine is an important consideration; many sections of the highway are not accompanied by a traffic control team when verge cutting. Due to the licence profile of the Council's, the machines

kerb weight cannot be more than 6 tonnes.

Total value (estimated)

- £360,000 excluding VAT
- £432,000 including VAT

Above the relevant threshold

Contract dates (estimated)

- 14 November 2025 to 31 March 2029

Price	Price	60.00%
Suitability for Grass Cutting Functions	Quality	14.00%
Construction and Delivery Timescales	Quality	12.00%
Design	Quality	10.00%
Community Benefits	Quality	4.00%

Other information

Applicable trade agreements

- Government Procurement Agreement (GPA)
- Comprehensive and Progressive Agreement for Trans-Pacific Partnership (CPTPP)

Conflicts assessment prepared/revised

Yes

Procedure

Procedure type

Open procedure

Justification for not publishing a preliminary market engagement notice

The procurement is being undertaken to fulfil a known requirement for purchasing or tractors and front and rear flail mowers for undertaking verge and hedge maintenance on the Trunk Road network within the County of Powys. The Council has previously procured similar equipment and has a clear understanding of the specification requirements, which are shaped by the operational constraints of the machinery in use.
