Procurement identifier (OCID): ocds-h6vhtk-03f6bb

Published 22 August 2025, 3:32pm

Section I: Contracting authority

I.1) Name and addresses

NHS Greater Glasgow and Clyde

Procurement Department, Glasgow Royal Infirmary, 84 Castle Street

Glasgow

G4 0SF

Email

Oliver.Bailey@ggc.scot.nhs.uk

Telephone

+44 1412015388

Country

United Kingdom

NUTS code

UKM82 - Glasgow City

Internet address(es)

Main address

<http://www.nhsggc.scot/about-us/procurement/>

Buyer's address

https://www.publiccontractsscotland.gov.uk/search/Search_AuthProfile.aspx?ID=AA10722

I.2) Information about joint procurement

The contract is awarded by a central purchasing body

I.4) Type of the contracting authority

Body governed by public law

I.5) Main activity

Health

Section II: Object

II.1) Scope of the procurement

II.1.1) Title

Replacement Fire Alarm Panels Glasgow Royal Infirmary

Reference number

GGC1022

II.1.2) Main CPV code

- 31625000 - Burglar and fire alarms

II.1.3) Type of contract

Supplies

II.1.4) Short description

Following on from recent works completed by ADT/JC at GRI to modify and upgrade the Old Royal fire alarm system further works are required to install a category L1 system. These works will ensure compliance with current legislation and SHTM 82 which states category L1 system should be provided throughout all parts of hospital premises. A fire alarm system is an important life safe system and category L1 provides the earliest possible warning of fire, so as far to achieve the longest available time for escape. Acute hospital settings include in-patient areas, high dependency, vulnerable occupants in a high risk environment where early warning is essential to preserve life and maximise time to carry out an evacuation.

Johnston controls/ADT have successfully completed site wide modification and renewal works in recent years and also provide on going maintenance and support for fire detection systems within the GRI and have on-site support and extensive knowledge of these systems. Due to the size and complexity of the site Johnston Controls are best equipped to provide the installation support for the upgrade to category L1.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.

II.1.6) Information about lots

This contract is divided into lots: No

II.1.7) Total value of the procurement (excluding VAT)

Value excluding VAT: £164,000

II.2) Description

II.2.2) Additional CPV code(s)

- 31625000 - Burglar and fire alarms

II.2.3) Place of performance

NUTS codes

- UKM82 - Glasgow City

Main site or place of performance

Glasgow Royal Infirmary

II.2.4) Description of the procurement

Following on from recent works completed by ADT/JC at GRI to modify and upgrade the Old Royal fire alarm system further works are required to install a category L1 system. These works will ensure compliance with current legislation and SHTM 82 which states category L1 system should be provided throughout all parts of hospital premises. A fire alarm system is an important life safe system and category L1 provides the earliest possible warning of fire, so as far to achieve the longest available time for escape. Acute hospital settings include in-patient areas, high dependency, vulnerable occupants in a high risk environment where early warning is essential to preserve life and maximise time to carry out an evacuation.

Johnston controls/ADT have successfully completed site wide modification and renewal works in recent years and also provide on going maintenance and support for fire detection systems within the GRI and have on-site support and extensive knowledge of these systems. Due to the size and complexity of the site Johnston Controls are best equipped to provide the installation support for the upgrade to category L1.

The reason this requirement has been published as a VEAT in addition to above is that ADT are thought to be the only company that can access the current closed protocol panels and upload them to the new open protocol panels.
