DN775309

Description

Cornwall Council is conducting a soft market test to inform the development of a 15-year initial term concession contract (with an option to extend by 1 further year) for Electric Vehicle Infrastructure (EVI), part-funded by the Government's Local Electric Vehicle Infrastructure (LEVI) fund.

The LEVI fund is a UK government initiative designed to support local authorities in expanding EVI. The LEVI Capital Fund specifically aims to:

- Drive a step-change in the deployment of primarily low-power, on-street EV charging across England.
- Accelerate commercialisation and attract private investment into the local charging sector.

Cornwall Council has secured its full allocation of LEVI funding. The majority, £3,106,300, will be used to procure a new external concession contract. The authority is considering using Crown Commercial Services (CCS) contract as a basis to facilitate running an open market procurement for publicly available, on-street EVI services. Cornwall Council would like this funding to help deliver at least 2,000 new EV chargepoints across Cornwall by 2030.

Please note - the contracting authority has a maximum budget of £3,106,300 million (ex vat). The final contract value will include additional capital investment from the successful bidder, anticipated to be at least 60% of the total project cost, subject to bidder proposals and commitments.

Disclaimer - the final contract value will be determined through the competitive process.

Total value (estimated)

- £3,106,300 excluding VAT
- £3,727,560 including VAT

Above the relevant threshold

Contract dates (estimated)

- 12 October 2026 to 11 October 2041
- Possible extension to 11 October 2042
- 16 years
