Scope

Description

We are conducting a market engagement exercise to explore the availability, capability, and maturity of tools and services that support cyber-attack path analysis. This initiative aims to assess solution readiness, innovation potential, and supplier experience in delivering outcomes aligned with proactive cyber defence objectives.

We are particularly interested in understanding products or services that automate the generation and analysis of cyber-attack paths on a National Grid scale based on data from each of the following categories:

- . Computing assets
- . Network connections
- . Cyber vulnerabilities
- . Identity and access management

This RFI is intended to inform our sourcing strategy and identify potential partners with relevant expertise and solutions.

Please note:

Detailed technical requirements and supporting documentation will be shared only upon receipt of a signed Non-Disclosure Agreement (NDA). The NDA must be executed by both parties and is issued on a non-negotiable basis.
