Description

Water Benefits Update – Phase 3.1: Shared and Contested Values Research - STA

Services:

The objective of this contract is to explore how deliberative processes can shape shared and contested values for the freshwater environment, and how these values differ from the individual willingness-to-pay (WTP) estimates.

This research will inform the broader valuation framework under Phase 3 (Water Benefit Update) and support more inclusive, equitable, and context-sensitive decision-making at the catchment scale.
