Your response must include the information below

Cost criterion / Price

The existing provider(s) is satisfying the contract and will likely satisfy the proposed contract to a sufficient standard.

Weighting:100

The service has been reviewed against the key criteria of the Provider Selection Regime. The criteria were given the following weightings throughout.

Quality and innovation (including performance): 60%, including 40% for performance against contractual KPIs.

Value: 10%

Integration, collaboration and service sustainability: 10%

Improving access, reducing health inequalities and improving choice: 10%

Social value: 10%

The existing provider scored over 70%, which is the Contract Authority's pass mark to proceed with the intent to award notice.

The existing provider has consistently met the majority of KPIs (6 out of 9) within the preceding 12 months.

Under-performance against 2 out of 9 KPIs has been marginal, and where performance improvement can be evidenced throughout the preceding 12 months. The Contracting Authority has assessed this to be acceptable.

The existing provider's non-achievement of 1 Key Performance Indicator - for its call-handling response - has been scrutinised (throughout the 2024/25 financial year) and has been subject to a specific project since April 2025 to reduce the volume of calls and improve performance. From April 2025 to July 2025, under-performance is now marginal and the KPI has been met in-full for June and July 2025. The Contracting Authority has assessed this to be acceptable.

For the other aspects of the key criteria, the Contracting Authority adopted a standardised

scoring matrix. This consisted of assessing the information from the review of service against the requirements listed within the statutory guidance for the Provider Selection Regime.

There are no declarations of Interest.
