Scope

Description

NPL will create new semiconductor metrology capabilities to improve the UK's infrastructure for pre-competitive semiconductor innovation, supporting investment and growth in next-generation materials and processes. The project will create metrology capability to support the manufacture of advanced semiconductor materials for end use in power electronics, radio frequency (RF) communications, and optoelectronics.

New capabilities will be hosted at NPL and academic partners and made available to UK industry to de-risk investments, support growth, and secure access to international markets.
