Description

Royal Berkshire Fire Authority required an upgrade for The Building Management System, The Building Management System (BMS) is an advanced, computerised control platform that oversees and regulates the mechanical, electrical, and safety components of the building-including HVAC (Heating, Ventilation and Air Conditioning) and lighting-for headquarters. Due to the age of the existing system, it is currently experiencing failures and replacement parts are increasingly difficult to source as they become obsolete. To ensure safe and efficient management of the facility, an upgraded system is required.
