Published 17 September 2025, 1:18pm

Scope

Description

Award to Rhomberg Sersa UK limited for MFS+/UMH (in line road/rail excavation plant) provision including maintenance and operation. This plant is primarily for use in single line scenarios where there is no other method of delivering the track renewal in the available access. A similar arrangement has been in place for the latter part of 2023/24 and all of 2024/25 through a contract awarded by Supply Chain Operations.

Contract 1. Plant Hire, operate and maintenance services of UMH or MFS+

Supplier

- Rhomberg Sersa UK limited

Contract value

- £3,189,324 excluding VAT
- £3,827,189 including VAT

Above the relevant threshold

Earliest date the contract will be signed

3 October 2025

Contract dates (estimated)

- 6 October 2025 to 31 March 2027
- Possible extension to 30 June 2027
- 1 year, 8 months, 26 days

Description of possible extension:

This Agreement automatically expires at the end of the Term, but may be extended prior to its end, at the Client's sole discretion, by the Client issuing written notices of extension to the Supplier, provided such notices do not extend the Term beyond 31/06/27.

Procedure

Procedure type

Direct award

Special regime

Utilities

Direct award justification

- Single supplier - technical reasons
- Additional or repeat goods, services or works - extension or partial replacement

The MFS+/UMH Plant is required to undertake single line track renewals where there is no other method of delivering the track renewal in the available access.

This included the service provision, including maintenance and operation of the plant.

There are only two MFS+'s machines in the country, so these resources are scarce, and there is a requirement to utilise the plant imminently to make use of possession availability.

Utilisation of this contract will reduce capex cost to deliver single line/ALO (Adjacent Line Open) affected sites vs conventional methods, which would result in significantly increased costs for single line jobs, resulting in reduced volumes delivered.
