Contract

**The scope of work is to deliver the Cloud Detection & Response (CDR)/ Cloud Native Application Protection Platform (CNAPP) services using the Wiz CNAPP cloud native platform (Wiz CNAPP cloud).**

Scotland Gas Networks (SGN)

F06: Contract award notice – utilities

Notice identifier: 2025/S 000-057489

Procurement identifier (OCID): ocds-h6vhtk-02874b

Published 17 September 2025, 4:58pm

## **Section I: Contracting entity**

### **I.1) Name and addresses**

Scotland Gas Networks (SGN)

St Lawrence House, Station Approach

Horley

RH6 9HJ

#### **Email**

[mobasshir.mushtaq@sgn.co.uk](mailto:mobasshir.mushtaq@sgn.co.uk)

#### **Country**

United Kingdom

#### **Region code**

UK - United Kingdom

**Internet address(es)**

Main address

<https://www.sgn.co.uk>

**I.6) Main activity**

Production, transport and distribution of gas and heat

---

**Section II: Object**

**II.1) Scope of the procurement**

**II.1.1) Title**

The scope of work is to deliver the Cloud Detection & Response (CDR)/ Cloud Native Application Protection Platform (CNAPP) services using the Wiz CNAPP cloud native platform (Wiz CNAPP cloud).

**II.1.2) Main CPV code**

- 79710000 - Security services

**II.1.3) Type of contract**

Services

**II.1.4) Short description**

The scope of work is to deliver the Cloud Detection & Response (CDR)/ Cloud Native Application Protection Platform (CNAPP) services using the Wiz CNAPP cloud native platform (Wiz CNAPP cloud).

CNAPP is a convergence of 3 different capabilities, which provide the foundations for an effective Cloud Detection and Response (CDR) capability which SGN does not currently have. This brings together the following three areas:

### Cloud Security Posture Management (CSPM)

CSPM continuously monitors, identifies, alerts on, and remediates compliance risks and misconfigurations in cloud environments. Cloud misconfigurations are often exploited by threat actors. CSPM systems monitor cloud assets, then continually and automatically check for cloud misconfigurations that may result in data breaches. Cloud environments can be extremely complicated, and mistakes can be very hard to detect and manually

### Cloud Infrastructure Entitlements Management (CIEM)

Monitors human and service identities; effective permissions; and exposed secrets across cloud environments. CIEM continuously analyses risk and generates least privilege access

policies to efficiently remove any unused, risky, or excessive privileges. This mitigates the risk of escalation of privilege, lateral movement and ultimately data breaches in the cloud. IT currently does not have this level of visibility onto cloud permissions and identities.

### Cloud Workload Protection (CWP)

CWP's monitor workloads in the cloud, scan for vulnerabilities and provide information regarding those vulnerabilities.

The Pricing Model for the SGN CDR/CNAPP solution and service is based on a combination

of the service elements requested by SGN.

The basis of pricing is outlined below and tailored to meet SGN's requirements.

#### **II.1.6) Information about lots**

This contract is divided into lots: No

#### **II.2) Description**

### **II.2.3) Place of performance**

NUTS codes

- UK - United Kingdom

### **II.2.4) Description of the procurement**

The scope of work is to deliver the Cloud Detection & Response (CDR)/ Cloud Native Application Protection Platform (CNAPP) services using the Wiz CNAPP cloud native platform (Wiz CNAPP cloud).

CNAPP is a convergence of 3 different capabilities, which provide the foundations for an effective Cloud Detection and Response (CDR) capability which SGN does not currently have. This brings together the following three areas:

Cloud Security Posture Management (CSPM)

CSPM continuously monitors, identifies, alerts on, and remediates compliance risks and misconfigurations in cloud environments. Cloud misconfigurations are often exploited by threat actors. CSPM systems monitor cloud assets, then continually and automatically check for cloud misconfigurations that may result in data breaches. Cloud environments can be extremely complicated, and mistakes can be very hard to detect and manually

Cloud Infrastructure Entitlements Management (CIEM)

Monitors human and service identities; effective permissions; and exposed secrets across cloud environments. CIEM continuously analyses risk and generates least privilege access

policies to efficiently remove any unused, risky, or excessive privileges. This mitigates the risk of escalation of privilege, lateral movement and ultimately data breaches in the cloud.

IT currently does not have this level of visibility onto cloud permissions and identities.

## Cloud Workload Protection (CWP)

CWP's monitor workloads in the cloud, scan for vulnerabilities and provide information regarding those vulnerabilities.

The Pricing Model for the SGN CDR/CNAPP solution and service is based on a combination

of the service elements requested by SGN.

The basis of pricing is outlined below and tailored to meet SGN's requirements.

### 1. Subscription and Product Support:

a. Based on CNAPP SaaS platform services and based the volumes of SGN Cloud assets being monitored.

b. Premium Wiz Platform support.

### 2. Initial Deployment / Onboarding:

a. Phase 1 - Solution Design:

b. Phase 2 - Enablement and Prioritization:

c. Phase 3 – Integration, Testing and Go Live:

d. Phase 4 - Training and Knowledge Transfer:

3. Training: The Supplier will provide a range of Knowledge Transfer to SGN Security and Admin/platform personnel as outlined in Initial Deployment/Implementation. As part of the Wiz service, SGN can have access to a range of online training material at Wiz Academy. Through the Premium Support, SGN can also receive enablement sessions to empower specific SGN roles (i.e. GRC) such as on setting compliance policies for reporting and alerting (as Ofgem requirements change).

A solution is needed within the business to meet current and future cyber threats across

its cloud infrastructure/environment. The CNAPP solution will allow SGN to overcome potential threats and exposure within the business.

#### **II.2.11) Information about options**

Options: No

#### **II.2.13) Information about European Union Funds**

The procurement is related to a project and/or programme financed by European Union funds: No

---

## **Section IV. Procedure**

### **IV.1) Description**

#### **IV.1.1) Type of procedure**

Negotiated procedure with prior call for competition

#### **IV.1.3) Information about a framework agreement or a dynamic purchasing system**

The procurement involves the establishment of a framework agreement

#### **IV.1.8) Information about the Government Procurement Agreement (GPA)**

The procurement is covered by the Government Procurement Agreement: No

### **IV.2) Administrative information**

#### **IV.2.1) Previous publication concerning this procedure**

Notice number: [2021/S 000-000004](#)

---

## **Section V. Award of contract**

A contract/lot is awarded: Yes

### **V.2) Award of contract**

#### **V.2.1) Date of conclusion of the contract**

20 February 2025

---

## **Section VI. Complementary information**

### **VI.4) Procedures for review**

#### **VI.4.1) Review body**
